

RPA-as-a-Service

Solution Overview & Robot Experience

Why HPA

At HPA, we believe robotic process automation (RPA) should be accessible for every health plan. Our unique, fully-managed RPA-as-a-Service model provides an accelerated path to automating painful business processes while also minimizing risk and controlling costs.

With licensed RPA software, there are many unforeseen barriers and hidden costs in developing and maintaining an automation initiative. From hiring and retaining trained staff to change management and governance, a mature automation program requires a significant investment of resources to see the ROI touted in the marketplace.

HPA evaluates, builds, tests, and operates your automation initiative from start to finish. No complicated licensing requirements, lengthy training classes, or hidden fees. We deliver instant scalability and reliable outcomes at a predictable, transparent price.

**Health plans experience
an average cost savings
of 66% with HPA.**

How it works

HPA's team of automation specialists work with your subject matter experts to identify and evaluate key pain points within your business; processes that are labor-intensive, time-consuming, and don't add value to the business overall.

Once target processes are selected, they are prioritized and our specialists get to work. We walk through each process with your team, documenting every step the user takes within the applications they use every day to complete their work. Documented processes are then validated by the client to ensure every aspect of the process has been accounted for and documented. Once you sign off, robot configuration begins.

Our automation engineers configure each robot exactly to specification. Each new robot goes through several rounds of rigorous testing, ensuring that your new digital workforce is delivering the results you expect, before being deployed in the live environment.

Our work doesn't stop there. Your digital workforce is always under the watchful eye of our sophisticated Robotic Command Center, as well as our automation operators who are ready to handle any errors or exceptions, should they occur. At the end of every day, you receive an outcome report showing what your digital workers did that day.
