

RPA-as-a-Service

Solution Overview & Robot Experience

Why HPA

At HPA, we believe robotic process automation (RPA) should be accessible for every company. Our unique, fully-managed RPA-as-a-Service model provides an accelerated path to automating painful business processes while also minimizing risk and controlling costs.

With licensed RPA software, there are many unforeseen barriers and hidden costs in developing and maintaining an automation initiative. From hiring and retaining trained staff to change management and governance, a mature automation program requires a significant investment of resources to see the ROI touted in the marketplace.

HPA evaluates, builds, tests, and operates your automation initiative from start to finish. No complicated licensing requirements, lengthy training classes, or hidden fees. We deliver instant scalability and reliable outcomes at a predictable, transparent price.

HPA's fully-managed RPA-as-a-Service model is 2 to 5 times more cost effective than licensed RPA software.

How it works

HPA's team of automation specialists work with your subject matter experts to identify and evaluate key pain points within your business; processes that are labor-intensive, time-consuming, and don't add value to the business overall.

Once target processes are selected, they are prioritized and our specialists get to work. We walk through each process with your team, documenting every step the user takes within the applications they use every day to complete their work. Documented processes are then validated by the client to ensure every aspect of the process has been accounted for and documented. Once you sign off, robot configuration begins.

Our automation engineers configure each robot exactly to specification. Each new robot goes through several rounds of rigorous testing, ensuring that your new digital workforce is delivering the results you expect, before being deployed in the live environment.

Our work doesn't stop there. Your digital workforce is always under the watchful eye of our sophisticated Robotic Command Center, as well as our automation operators who are ready to handle any errors or exceptions, should they occur. At the end of every day, you receive an outcome report showing what your digital workers did that day.

Discover the automation possibilities in your business

In any industry, across departments, functions, and internal tools, if a process utilizes a user interface, HPA can automate it.

F&A	Operations	Compliance/ Legal	IT	Universal
Financial Adjustments	Vendor Onboarding/ Offboarding	Compliance Reporting	Systems Migration	Data Entry
Payment Authorization	Data Management	Licensing & Registration	Data Migration	Data Manipulation
Order-to-Cash	Systems Monitoring	Policy Administration	New User Setup & Configuration	Data Validation/ Reconciliation
Collections	3rd Party Portal Queries	Fraud & Abuse	Legacy System Run Out	Forms Processing

Organizations utilizing RPA have automated F&A processes by up to 80%, increased Accounting productivity by 50%, and improved shared services efficiency by as much as 75%.
